| TUN                    | 19300602355187         |

### **Product Information**

### Organoleptic properties

The pink salmon has been prepared from fish which has been transversely cut and filled vertically into the can (the backbone is parallel with the vertical axis of the can). Visible pieces of bone are present and skin is parallel to the can wall. The salmon should be fairly firm and flaky in texture (should break easily into discrete pieces) but is not excessively mushy or tough. Colour can vary from pink to a buff (yellowish-beige) with minimal colour contrast between pieces. The salmon should have a salty fish flavour and be free from off or ammonia odours.

### **Appearance**
